The ARCS Seminar

Constructing C*-correspondences over Cuntz-Pimsner Algebras

Menevşe Eryüzlü

University of Colorado Boulder

Abstract: We construct a functor that maps C*-correspondences to their Cuntz- Pimsner algebras. We then use our functor to investigate the passage of certain C*-correspondence relations to the associated Cuntz-Pimsner algebras. If the time permits, we shall discuss other "possible" applications of this functor.

Time and Place: Wednesday, November 3 from 5:00–6:00PM (Mountain Time Zone) in ENGR 239

The Rings and Wings Seminar is an activity of ARCS.
